PITCH STEP 01 / 04

THE SOLUTION

Buy Stellar USDC through Revolut.

- The seller sets a price and funds USDC escrow.
- The buyer pays exact euros and verifies the transfer.
- USDC arrives in the buyer's Stellar wallet.

Mainnet completed: €0.89 paid, 1 USDC received.
26 October 2026 at 09:52 UTC

Product demo uses a sample quote

PITCH STEP 02 / 04

PMF

Euros in Revolut. A Stellar wallet to fund.

- Buyers need a clear route to USDC for an app or payment.
- Suppliers choose a quote and receive euros directly.
- Funded offers and a shared receipt make the trade clear.

Next: ten small EUR trades with repeat suppliers.
Measure completion, verification time and repeat use.

PITCH STEP 03 / 04

TECHNICAL WORKFLOW

One authenticated payment. One escrow release.

- Freighter approves escrow funding and the payment lock.
- TLSNotary authenticates the Revolut transfer response.
- Policy matches the order and signs its release claim.
- Soroban checks the claim and prevents payment reuse.

The contract trusts the configured payment signer.
Both wallets must approve recovery after payment locks.
